No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

PATENT NO. 6253455

GENERAL INFORMATION:
APPLICANT: Siegel, Donald L.

TITLE OF INVENTION: CATION FOR PROTEINS AND MAGNETICALLY ACTIVATED CELL
TITLE OF INVENTION: CORTING METHOD FOR PRODUCTION THEREOF

FILE REFERENCE: 09596-42U2
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    GENERAL INFORMATION:
